

Diabetes & Vascular Disease Research

Diabetes & Vascular Disease Research published alternate monthly

***Diabetes & Vascular Disease Research* published alternate monthly**

This allows us to maintain rapid publication of accepted papers. It also reflects the significant increase in submissions of manuscripts to the title over the last two years.

Submission rate triples in 12 months

About 125 manuscripts have been submitted for peer-review in the last 12 months – tripling the number of submissions last year. About two-thirds of papers submitted included original basic and clinical research with the balance being largely non-invited and invited reviews by acknowledged leaders in their fields.

The current rejection rate is 36.6% and increasing.

Papers have been submitted from researchers in 32 countries and have been reviewed by a panel of more than 100 reviewers worldwide.

Rapid review of manuscripts

The average time to final acceptance or rejection of papers now submitted is 60 days.

Early on-line publication – free, open access on-line

All accepted papers now published in full on-line within 20 days of acceptance as downloadable PDFs.

The full contents of *Diabetes & Vascular Disease Research* is available at www.dvdres.com. Access is free-to-all and unrestricted.

Significant increase in on-line traffic

More than 3000 subscribers per issue receive the print journal. In addition, about 8500 visitors/month visit the website monthly including > 4000 from Pubmed which now has direct links from the indexed abstracts to the full, downloadable free PDFs of papers. Currently, > 400 papers are being downloaded/month.
